## 'Transforming India digitally'

**VIDUSHI DAGA, CEO of Clone Futura speaks with SANGEETA YADAV about the training organisation that aims at teaching IT and computing modules to children, housewives and senior citizens**

**What is Clone Futura all about?**

It is an onsite and home-based training that we impart to people on a regular basis. We teach them about the various tech gadgets around them and their application. Clone Futura has taken a step in this direction towards empowering senior citizens, housewives and children to take charge and to contribute more effectively. We offer a unique and promising business proposition that has no known competitors. Our mission is to make every housewife a successful entrepreneur and our motto is to transform India digitally.

**Tell us about its modules?**

The modules are simple and easy to follow with step by step explanatory content with illustrations. Each module is designed to the apprentice as per the demands and needs of the market.

**What are the latest developments you have seen in the field of computer training?**

To me, I can think of a new digital wave, where technology is leading in every field. Computers are becoming what produces to stock on shelves, performing legal discovery and are used for even winning games. Computers will soon be driving our cars and making medical diagnoses. That's why tech-savvy companies are becoming increasingly interested in investing in things like content, from which we see it sign onto massive online services to entertain and educate users. Better training have fuelled the ambitions of more than 100 million people, providing the skill to succeed in the computer age. It is time to think about the challenges in this field?

One of the biggest challenges in technology and its rapid infiltration into our lives, some people are finding it difficult to cope with it. The biggest challenge is to ensure that every citizen has access to the latest technology and that it is used effectively.

Vidushi Daga, Founder & CEO, Clone Futura

Teaching at a senior's perspective. At the center, the idea with associated systems with time to time training to enhance operational efficiencies are some of the solutions through which one can deal with challenges.

**India could be the driving force behind a global skills-based economy**

Education should be practical based rather than knowledge theoretical based and the young generation needs to be equipped with more skills in order to get employment and only then we can think of a bright future for the country, says Vidushi Daga, founder and director of Clone Futura.

India could be the driving force behind a global skills-based economy. In our society it is not only knowledge that matters but if you have the skill to do something you can guarantee work. Children must be taught how to think and not what to think," she told The Education Post.

## 75 whiz kids are felicitated

Mumbai: Seventy-five talented tech whiz kids from all over India were felicitated for winning awards in a fiercely contested gamified competition in the city on Thursday. The ceremony was held at the NSIC, Worli. A release said that biggest online technology competition of its kind, 'WHIZ Juniors 2017' was a pan-India contest organised by the Mumbai-based Clone Futura. Eminent personalities present on the occasion included Gowri Ishwaran, chief executive officer of the Global Education and Leadership Foundation and Dr Jawahar Suriseti, prominent education advisor.

## MESSAGE

I was pleased to learn about Clone Futura's Whiz Junior Grand Award Show which celebrates online learning and digital literacy among schools and its students.

In the age of advancing digital world, the field of education too should be well versed with the changing face of technology. Initiative like Whiz Junior have a growing need to advance the process of learning and transform the traditional teaching techniques. Schools should contribute equally to the technological revolution in schools and help advance the pace of digital learning in our Nation.

I extend my best regards to the award function and all future endeavours by Clone Futura.

Thank You.

Yours,

  
(Vinod Tawde)

Dear Ms Daga,

1. I would like to express my thanks & appreciation for the computer training conducted by your organisation for the families and wards of Army personnel from 15 Jan to 14 Feb 2014 & 17 Feb to 21 Feb 2014.

2. The professional manner of conducting computer classes by your institute goes to show your commitment to the cause of enhancing IT literacy & awareness. The feedback received from the trainees was excellent.

3. HQ Mumbai Sub Area is grateful to you for this initiative of yours. If we can be of any assistance to you in future, we shall be pleased to extend all possible help from our side.

with warm regards

yours sincerely

## MESSAGE

I am happy to know about 'Techathon 2014', the Tech Competition organised by Clone Futura's Whiz Juniors.

In the fast-paced digital age of today, it is essential that students are guided well to make innovative and productive use of their screen time and utilize technology to tap their innate talents. Your vision, to empower and transform India digitally and to provide tech education to people, in the right way, is indeed praiseworthy. Through novel initiatives, you have made a greater impact in society, by providing a platform to all, to be equipped with 21st Century Tech skills which can be effectively used in day to day life. In doing so, you strengthen the foundation of Digital New India.

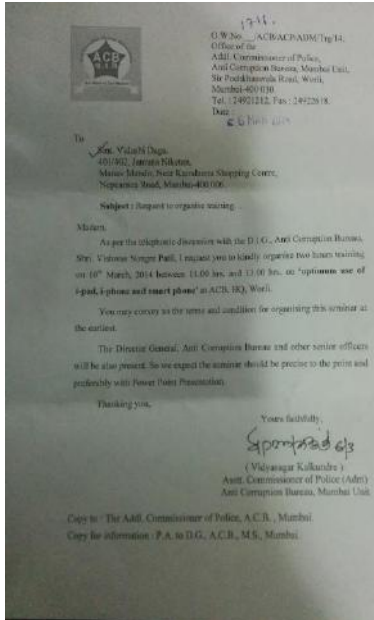

Congratulations, once again, and best wishes for your future endeavours.

Thank you.

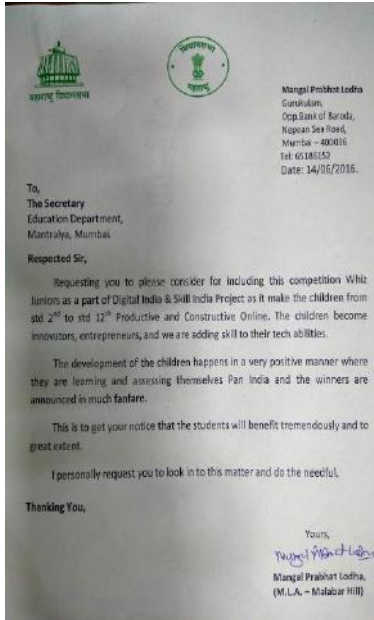

Yours,

  
(Vinod Tawde)
